### 4. Explanations, Comments and Best Professional Practices<sup>3</sup>.

Irrigation Training and Research Center Method adjusted for effective precipitation, cultural practices, and system irrigation efficiencies. Although deliveries are not measured, the deliveries are closely monitored. The quantities in the table above have been estimated based on crop data and the Cal Poly

recharge/conjunctive use, water transfers, wheeling to other agencies, urban use, etc). Note: An agricultural water supplier's total water use may be different from Aggregated Farm-Gate deliveries because measurement at these points may not account for other practices (such as groundwater

- 1. "Farm-gate" means the point at which water is delivered from the agricultural water supplier's distribution system to each of its individual customers as specified in the Agricultural Water Measurement Regulation (Title 23, Division 2, Chapter 5.1, Article 2 of the CCR).
- 2. "Aggregated farm-gate delivery data" means information reflecting the total volume of water an agricultural water supplier provides to its customers and is calculated by totaling its deliveries to customers. Data shall be organized by basin or sub-basin per Water Code Secion 531.10(a)(1). See DWR Bulletin 118 for list of groundwater basins and sub-basins.
- 3. "Best Professional Practices" is defined in Title 23, Division 2, Chapter 5.1, Article 2 of the CCR, Section 597.2.
